VK7ID	Phill Groom	QE37QA, QE36QX	113	4411

## SOAPBOX

**VK2ACD** thanks for the contest

**VK2SRC** Great weekend had by all, a bit cool -7ÿFFFFBOC and very windy. Kevin VK4UH made the trip down from Brisbane for a very successful trial of 10GHz from the site.

**VK2XI** Great contest.

**VK3HY** 01:00 UTC Start time for Winter FD is still causing confusion. 01:00 UTC start was intended for Spring and Summer Field Days when AEDST applies. There was very little activity here until 02:00 UTC. Can we please go back to the way it was?

**VK3WWW** Not too many contacts but it was a nice hour or so operating,

**VK4I (VK4CZ)** A great activatyion, if all too short. A few great QSO completed, and pushed the limits just a little more. It's what it's all about. Correct? The +400km round trip to Mt Mowbullian QG53TC08 to activate as VK4I for 3hrs for me made worth while with a few great contacts on 3.4 and 10GHz.

**VK6KQ** Great contest & first 23cm QSO!

**VK7CMS** FIRST CONTEST HOME STATION FOR THE MENS SHED

**VK7ID** Another great field day. Thanks to all the stations who contacted me and had to deal with my roving grid changes.

**VK7WN** Only 2m and 70cm. A fun day.
